

# 89 Solutions Technical Interview

## Home Assignment

### Coda.io document export and download via API

#### Context

- This is a take-home assignment.
- Candidates can do this in an unmonitored environment
- Candidates can use any online resources to complete this assignment.
- All information required for completing this assignment is publicly available online.
- The instructions of the assignment are deliberately kept very high-level to test a candidate's ability to find information/answers themselves and to check their thought process and self-learning ability. Candidates are welcome to ask any clarifying questions if the assignment instructions are unclear.

#### Assignment

1. Create a free [Coda.io](https://Coda.io) instance
  - a. The free instance will have some sample docs and pages present in it - view those docs and pages to familiarize yourself with Coda's data-model / content-hierarchy.
2. Pick any one page in your Coda instance and export it to HTML using [Coda.io](https://Coda.io) APIs.
  - a. You can use an API testing tool like Postman or Insomnia for making the API call/s.
3. Demonstrate successful execution of the API call/s in the follow-up interview with 89S team.
